

ANGELO ESMERALDA

PROFESSIONAL EXPERIENCE POSITIONS

MOBILE SOFTWARE ENGINEER (V&V) – ABBOTT LABORATORIES (09/2023 – PRESENT)

- Worked on mobile apps for iOS and Android that were made for a Bluetooth cardiac monitor and pacemaker along with the web app that the mobile app communicates with.
- Designed, developed, and executed automated tests for the ecosystem around these devices using tools such as C#, Azure, Jenkins, Appium, Selenium, SourceTree, Git, and Bitbucket.
- Created tools using python that automate internal processes within the team and presented them in meetings to show others how to use it.
- Communicated effectively in daily stand-up scrum meetings in a team of more than 10 people, meetings with people outside of my team such as developers of the mobile app or other developers for the web app.
- Responsible for identifying and categorizing root problems within the mobile app or environment via testing and communicating with people outside of my team by creating tickets on Jira or messaging them directly.
- Acquired great understanding of most of the internal processes all my team members go through and took the lead in creating documentation that was designed to be useful to both newcomers and experienced members.

SOFTWARE ENGINEER (Front End) – WE2Link (08/2022 – 06/2023) (Internship)

- Worked on a website called 'Want2Remember' using ReactJS, Firebase, JavaScript, HTML, and CSS
- Collaborated with a team of 10 people using git and GitHub.
- Focused on designing the app in a way where it appeals to people who have cognitive/memory problems.

Education

University of California, Los Angeles

- Bachelor's Degree: Computer Science, California State University (08/2020 – 05/2023)
- Graduated with a GPA of 3.6 and a Cum Laude

Skills

- Languages: C# (8 Years), Java (8 Years), JavaScript (3 Years), Python (3 Years), C++ (3 Years), TypeScript (1 Year)
- Databases: MySQL (2 Years), MongoDB (2 Years), Firebase (1 Years)
- Frameworks: .NET (2 Years), Unity (4 Years), NextJS (2 Years)
- Tools: Git (3 Years), GitHub (3 Years), Jira (2 Year), Bitbucket (1 Year), SourceTree (1 Year)

PERSONAL PROJECTS

Action RPG RTS Game (11/2021 – Present) Documentation

- Developed a captivating dungeon crawler game using the Unity Game Engine and programming in C#, crafting an impressive codebase exceeding 90,000 lines.
- Implemented over 20 intricate systems, including Action RPG abilities, character customization, procedural map generation, inventory and item management, party group controls, advanced NPC behavior, and comprehensive accessibility options for sound and graphics customization.
